

New-Era® OXYGEN SENSORS

Oxygen sensors are used to measure a concentration of oxygen contained in exhaust gas. The sensors sends signals (the concentration of oxygen) to ECU (Engine control Unit) in order to optimize the fuel consumption.

The replacement of damaged oxygen sensors improves the fuel efficiency.

El sensor oxigeno mide el nivel de la densidad de oxigeno en los gases de escape.

El sensor envia los signos (el nivel de la concentracion de oxigeno) a ECU(Unidad de control de motor) para optimizar el consumo de combustibre.

El recambio del sensor danado se va a mejorar el rendimiento de combustibre.
